Bespoke Software Development Services

# Bespoke Software Development Services

Fit for purpose. Accelerated delivery.

At Advance we have over 30 years of software engineering expertise focusing on bespoke software solutions. Does your business have unique software needs outside of commercial products? Would you like to gain competitive advantage from high quality, efficient and tailor-made software solutions?

Our teams employ lightweight Agile software engineering methodologies which takes the changing nature of the business environment into account.

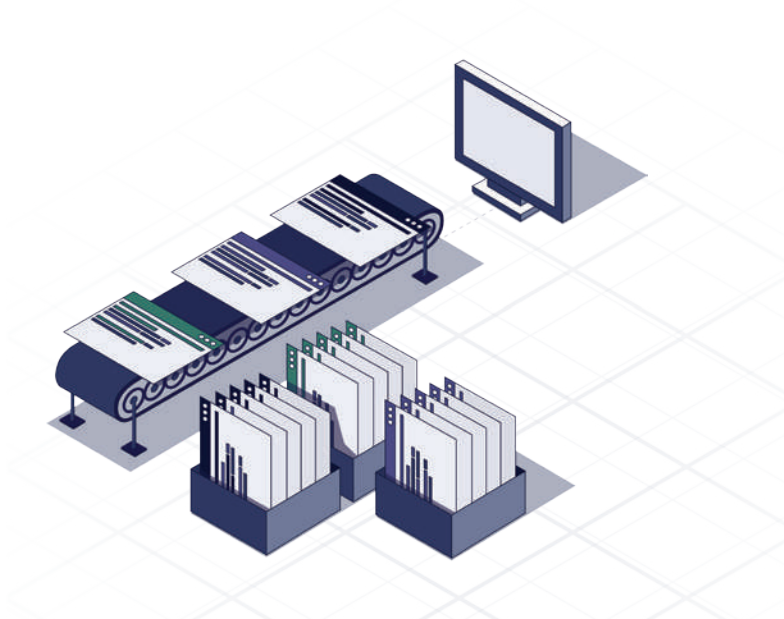

Frequent collaboration between engineers and product owners ensure a coherent and consistent quality of delivered software.

## Principles actively utilised in our projects:

- ✓ Service-oriented architectures maximising software reuse
- ✓ Open Source and Open Standards
- ✓ Domain driven design
- ✓ Test driven development
- ✓ Design by contract

- ✓ Continuous integration
- ✓ Continuous delivery
- ✓ Code reviews and collaboration

In addition, our SaaS and hosting services guarantees a low cost of ownership of your bespoke solutions.

At Advance we believe in forming long-term relationships with our clients in order to assist and enable organisations to achieve their strategic objectives and to broaden their competitive edge by implementing efficient and purpose-built technology.
